8. Water Regulator
9. Zone Valve (head)

## **Tank-Guard - \$49.95**

### ***Oil Tank Protection Program***

If you have a tank leak that is covered by the TANK-GUARD warranty, your oil tank will be replaced at no charge (parts and labor). Removal and certified disposal of your old tank is included. This warranty is provided directly by Lincoln Laboratories.

Your oil tank is eligible if it has not been repaired at any time and is not leaking now. Underground tanks and tanks of more than 330 gallons capacity are not eligible. Please refer to warranty statement for details.

### ***Service Contracts General Terms and Conditions:***

Issuance of the Service Contract is subject to inspection and approval by our service technician. If the system does not qualify for our Premium Service Contract, you will be charged for a tune-up if it is performed. In certain cases, a service contract can be issued upon the customer authorizing and paying for the installation of parts and/or additional labor needed to upgrade the heating system to our requirements. We reserve the right to cancel renewal of the Service Contract if upon inspection our service technician finds the heating system to be in poor working order or unsuitable for servicing by us.

Only parts specifically listed in the contract are covered. This plan does not cover repairs (parts or labor) to components such as ducts, piping, radiators, zone valves, oil tanks, vent alarm or any parts associated with water or steam (including flushing of steam boilers) or to the smoke pipe or the chimney. It does not cover service calls due to run-out of fuel when not the fault of the company or when alternate heat or heat sources are in use, or due to abuse, furnace switches turned off, blown fuses or tripped circuit breakers, flooding, inadequate ventilation of the system, vacant and unattended premises. Extra charges will apply due to delay or extra expense due to the inaccessibility of the system. All such service calls and non-emergency service calls outside our normal hours will be billed at our prevailing rates for labor and non-covered parts.

This contract is not a guarantee that the equipment will not fail to operate. It is an agreement to maintain and repair the equipment as provided for in the contract. We are not responsible for any damages due to any type of malfunction, leaks or environmental impairment, including consequential damages, unavoidable delays beyond our control or for work required as a result of abnormal conditions, such as floods, hurricanes, blackouts, freeze-ups, broken pipes or any acts of God, the government or other parties. No warranty is made as to the ability of the system to supply heat or hot water required by customer. OUR LIABILITY UNDER THIS AGREEMENT IS LIMITED TO THE REASONABLE VALUE OF THE SERVICE AND PARTS OFFERED IN THIS CONTRACT NOT TO EXCEED \$1,000.00.

The service agreement will be automatically canceled without further responsibility on our part in the event that your automatic deliveries are terminated. There will be no pro-rated refunds for early termination of the contract.

Provided your heating system qualifies, you may renew the service contract each year on the 12 month anniversary from date of original issue provided you pay the then current plan price and are current on all your obligations to us, and remain on automatic fuel delivery.

This plan covers residential burners up to 3 GPH firing rate. General Electric, and foreign burners, rotary and low speed (1725 RPM) burners are excluded.
